

The International Society of Automation
The ISA NJ Section Invites You to Attend a Program Meeting

“Certification, Recognition, and Licensure”

Date: Tuesday, February 21st, 2012
Time: 6:00pm Networking & Light Fare and Refreshments
7:00–8:00pm Program Meeting
Location: Jacobs Engineering, 299 Madison Ave., Morristown, NJ 07960
Directions: <http://www.jacobs.com/Office.aspx>
Speakers: Stan Rogacki, P.E., CCST - Licensed Professional Engineer and Certified Control Systems Technician
Bob Rosa, P.E. – Project Manager – Control Systems Design

Presentation: “Learn the Path to ISA Certifications in the Industrial Automation Industry”

CCST: Certified Controls System Technician – these technicians calibrate, document, troubleshoot, and repair/replace instrumentation for systems that measure and control level, temperature, pressure, flow, and other process variables.

CAP: Certified Automation Professional – those with this ISA certification are responsible for the direction, design, and deployment of systems and equipment for manufacturing and control systems.

Do not have the industry experience required for one of these certifications? Each of these certifications has an associate recognition program allowing you to demonstrate your commitment to achieving these certifications, and facilitating the process: those whom have completed an associate program are on a faster track to achieve their desired certification.

Who can benefit from this presentation? Whether you are a veteran with years of experience in the automation industry, or you are just beginning your education and wish to learn more of the career opportunities which await you in this field, we can help in providing a clear understanding of the path to these certifications and the benefits which accrue to those whom achieve them.

Please do plan to join us this evening and you’ll have an opportunity to meet some of the people in this industry whom have already gone down the path to these certifications – listen and learn of their experiences and perhaps you will soon be on your way to achievement.

Speakers:

Stan Rogacki, P.E.

Stan is president and COO of IDEAS Company of Caldwell, NJ. Stan has more than 30 years of Instrumentation & Controls, Automation, and Electrical Engineering experience including extensive lead start-up experience in commissioning of chemical, pharmaceutical, and utility (power, water treatment, waste water) plants and systems, using analog, PLC, and DCS based control systems.

Bob Rosa, P.E.

Bob is a project manager for Jacobs Engineering leading the controls group in their NYC office. Bob has 20 plus years experience in design and implementation of PLC based industrial automation systems. He holds a PE in Control Systems.

Attendance is limited PRE-REGISTRATION IS REQUIRED!
